**DETAILED ACTION**

***Response to Amendment***

1. Amendment filed February 20, 2007 has been entered.
2. Applicant's arguments filed February 20, 2007, have been fully considered but they are not found persuasive.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite "ΔF508 mutant", which is indefinite. There is no structure associated with this term and there is no art accepted meaning of this term at the time the instant invention was filed. Furthermore, terms are relative because on scientific paper may call the mutant one name and another paper by another name. Page 6 of the specification does not define the term. Therefore, the metes and bounds of what is to be encompassed by this term are unclear and the claims are indefinite.

Applicants argue that page 3 of the specification defines the term. However, there is not structure provided from which the deletion of phenylalanine at position 508 and thus it is not clear from which structure the amino acid deletion is occurring. Furthermore, the product which now lacks the deleted amino acid which is the only structure provided requires no structure at all because the term CFTR is not defined with a specific structure.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moyer et al. in view of Cormack and Chou et al.

The reason for the rejection has been set forth in the previous office action.

Applicants argue that the references do not teach claim limitation of "ΔF508 mutant human CFTR cDNA". However, as discussed in the above rejection for 35 112, the term is relative and is not clear what is the metes and bounds of the term. Furthermore, the previous action clearly sets forth that the CFTR-GFP nucleic acid meets the limitations of the claims that the CFTR is a "mutant" CFTR. The term "ΔF508 mutant human CFTR cDNA coding region" is not defined by the specification as a

specific structure nor the claims and thus does not exclude the CFTR-GFP of Moyer et al. CFTR is manipulated to create the CFTR-GFP construct and thus meets the claim limitations.

5. No claim is allowed.
